

INTRODUCTION

In consultation with BBYO's Medical Advisory Committee, BBYO is committed to enforcing policy and procedures for all individuals at camp to ensure the health and safety of our communities.

While news and information about COVID is ever-changing, we are continuously updating how our programs may be affected. BBYO is working to prepare the necessary measures to limit the spread of COVID-19 and to keep our teens, staff, and families healthy.

Please know this is a fluid document and as information changes and evolves, so will our guidelines. BBYO reserves the right to make changes to protocols and procedures throughout the summer. Thank you for your patience and understanding.

VACCINATIONS

Everyone attending must be fully vaccinated for COVID-19 by the Pfizer, Moderna, AstraZeneca, or Johnson & Johnson vaccines. All participants must receive the COVID-19 booster if their second vaccine dose (or first dose for Johnson & Johnson) was received more than 180 days before the start of their session. The booster must be received no later than 14 days before a participant's summer program arrival date.

TESTING

Pre-Camp Testing

NEW UPDATE: All participants are required to participate in two pre-camp tests.

Teens who have **NOT** had COVID in the 90 days before arrival are required to have a lab-certified PCR test 72 hours before arrival and a lab-certified or proctored antigen test 24 hours before arrival (NOTE: *a "proctored" antigen test is at at-home test kit that includes a virtual visit with an eMed Certified Guide who will help you properly administer the test and third-party verify the result.)

If a participant **HAS** had COVID in the 90 days before arriving at camp, they are required to have a lab-certified or proctored antigen test 72 hours before arrival and a lab-certified or proctored antigen test 24 hours before arrival.

Please see below for specific testing dates based on your session.

No home tests will be permitted.

Camp participants must arrive at Newark Airport or Camp, if being driven, with two negative test results. A participant may take a lab-certified rapid PCR test 72 hours before arrival but will still be required to take a lab-certified antigen test 24 hours before arrival as well.

When do I Take the Pre-Camp Tests?

***NOTE: ALL TESTS MUST BE LAB-CERTIFIED**

Program	Program Start Date	72 Hour PCR/Antigen Date	24 Hour Antigen Date
CLTC 1	June 7	June 4 between 3pm-midnight	Between 3pm June 6-June 7 before arrival
CLTC 2	June 21	June 18 between 3pm-midnight	Between 3pm June 20-June 21 before arrival
CLTC 3	July 5	July 2 between 3pm-midnight	Between 3pm July 4-July 5 before arrival
CLTC 4	July 19	July 16 between 3pm-midnight	Between 3pm July 18-July 19 before arrival
CLTC 5	Aug 2	July 31 between 3pm-midnight	Between 3pm Aug 1-Aug 2 before arrival
ILTC	June 23	June 20 between 3pm-midnight	Between 3pm June 22-June 23 before arrival
KALLAH	July 13	July 10 between 3pm-midnight	Between 3pm July 12-June 13 before arrival
CAMP BBYO	July 21	July 18 between 3pm-midnight	Between 3pm July 20-July 21 before arrival

Testing | If a Positive Result

If an individual tests positive **prior** to the start of the program, they will not be allowed to travel and join for that program session. If there are later summer program sessions with space available occurring at least 10 days after the positive test result, BBYO may transfer the teen's registration to a later program. BBYO will not offer refunds or transfer funds for any programs outside of Summer 2022.

Onsite Testing

Symptomatic individuals will be tested with a rapid test. BBYO reserves the right to randomly test anyone at camp for any reason, failure to comply will result in the removal from the program.

If a participant is not feeling well, they must go to the infirmary. Failure to go to the infirmary and report illness may result in further consequences for the teen, as it jeopardizes the health and safety of the entire community.

Onsite Testing | Positive Result

If an individual tests positive with a rapid antigen test onsite, they will be re-tested immediately to confirm results. If results confirm a positive case (with a rapid antigen test), the individual will be removed from programming, isolated from other participants with staff checking in, and will need to depart camp within 24 hours. **In this event, parents/guardians must be prepared that travel to camp to pick up their teen will be required, whether by parent/guardian or an emergency contact.**

If a teen in the bunk tests positive, asymptomatic teens from that bunk will need to wear N95 masks at all times when indoors for five days after initial contact with the positive teen. Social distancing guidance will be strictly followed during this period. BBYO reserves the right to test participants as we see fit.

NON-PHARMACUTICAL INTERVENTIONS

Continual hand washing

All participants and staff will have access to frequent hand washing and sanitizing.

Cleaning and disinfecting of public spaces

Staff will be responsible for additional cleaning and disinfecting of frequently used communal spaces.

Adjusting health center policies

Medical and wellness staff will utilize outdoor spaces as often as possible and utilize updated procedures to limit indoor meetings.

COMMUNICATIONS

Parents/guardians will receive general camp communications. In the event of a positive COVID case, the family of the teen with a positive result will receive communication from camp. All families of teens in the same cabin as the positive result will receive communications with details of precautions taken for the cabin. No personal details will be shared about individuals.

EXEMPTIONS

Vaccine medical exemptions are rare but may be considered. Those looking to be considered must share a letter from the child's pediatrician or specialist as well as full vaccine and medical history. BBYO's Medical Team will review exemption requests and the BBYO team will be in touch with the decision on exemption. Submissions should be shared here: [Immunization Waiver](#).
