

**Aleph Arthur Feidelson** (Portland – Chaim Weizmann AZA)

### **Vision Statement**

Over the course of my time in BBYO, I've always noticed how this region was very good at planning and carrying out regional and citywide community service events, but often lacked when it came to chapter events. However, I believe that there is room for improvement in all aspects of the community service we owe our northwest community. As Shaliach I would make sure to help all regional Shlichim coordinate with each other to plan inter chapter events, for higher turnout and to keep costs down (spread across more people). Also I would work very closely with the regional Mazkir and Mazkirah to make sure that all community service events get advertised to the greatest extent possible so that participation is very high. I believe that if more members take part in community service events, the more connected they will feel to their communities and each other. Ideally, merchandise would be sold at each regional event and hopefully most chapter and citywide events to raise funds for the event and to donate to charity (most likely to the place where the event is taking place). In the best case, I would try my best to coordinate and carry out at least 4 citywide events and 10 chapter events across the region during my term. I am running for Shaliach because I see an opportunity to help Evergreen Region better fulfill its duty to social and community service.

### **Mission Statement**

In order to achieve what I have proposed in my vision statement, I would work not only with the Shlichim network, but also make sure the Shlichim network (including myself) is in constant communication with Mazkirim and Gizborim across the region to ensure the promotion and fundraising capacity of all community service events.
