

CANDIDATE FOR THE NASSAU SUFFOLK REGION'S 41ST RAKKAZ  
Chase Nussbaum

**VISION STATEMENT:**

Being this year's rakkaz chair gave me an insight into how convention is planned. Being the right hand man to the rakkaz I was able to contribute to how the convention was run and the planning process behind it. I am extremely confident that I can better our already amazing convention. I plan to increase our promotion of our convention to attract more teens and I will work closely with the Mazgiz to fundraise sufficient funds for convention electives to help provide supplies to the steerers. Also after each steering meeting I want to meet with a committee to ensure progress. This will increase the productivity of the committees and help to organize our convention. Lastly I plan on keeping the beloved traditions of AZA and NSR that binds our brotherhood.

**What flaws do you see in the current steering system and what ideas do you have to solve these problems?**

One current flaw I see in the steering system is the misuse of steering captains. I feel they can be used more effectively as leaders in our region at convention. Another current flaw is that there is a lack of urgency with steerers. Steering captains can be used to keep steerers on task and finish their designated job faster which leaves extra time for improvement.

**How do you plan on keeping Alephs engaged for the entirety of the convention experience?**

I plan on keeping alephs engaged for the entirety of their convention experience by creating and helping to create engaging electives for alephs. Also I want to give alephs opportunities to participate in all aspects of convention that I possibly can.
