

CANDIDATE FOR THE NASSAU SUFFOLK REGION'S 63RD S'GANIT CHARLOTTE LEIGH

VISION STATEMENT:

This is your opportunity to state your own personal vision statement. What do you hope to accomplish for your term? To what lengths will you bring NSR in the upcoming year? Paint a picture for the changes that you will make in the future, and how you will get there.

Now more than ever, us BBGs need Sisterhood. It is the driving force of BBG, and is what brings us all together at every event, whether it be chapter, regional, or international. Because we missed out on so many opportunities to create new memories this year, my goal as Regional S'ganit will be to make up for all of the memories that we missed out on making together and give all BBGs more opportunities than ever to come together to create new memories. I will accomplish this by holding more regional events throughout the year such as adding a BBGG at the beginning of the year and having a BBGG event at the end of the year. I will also implement new regional events such as BBG Coffee House Night, BBG Founder's Day event, and Battle of the Chapters.

Often the 6 folds are lost in translation within BBG programming, how can you work to provide relevant and informative resources directly to regional and chapter programming?

Each of the 6 folds are imperative to BBG programming in their own ways. During the programming year, I will work with the Regional Mazkirah to constantly add new programs to the program bank on the NSR website with specific programs for each fold. In addition, I will constantly communicate with all of my chapter counterparts to ensure they are including at least 2 of the folds per each chapter meeting. I will also have my chapter counterparts submit each program to me a week before the meeting so that I can review the script and make sure it is perfect and will leave BBGs with memories to last forever. For regional programming, I will work with the BBG programming chair to create ways to incorporate the 6 folds at each event.

How do you intertwine international incentives into our region in a way to cater to our members

Including international incentives into our regional and chapter programming will help us as a region feel more connected to the entire international order, and help us connect with other regions holding the same events as us. A great way to intertwine international incentives into our region would be to hold a BBG Founder's Day event with all of our neighboring regions. Unlike Kickoff with the other New York Regions, this event will be more structured which will give BBGs the opportunity to form bonds with each other, make new memories, and new friendships.
