

CANDIDATE FOR THE NASSAU SUFFOLK REGION'S 63RD MAZKIRAH MAYA POLESE

VISION STATEMENT:

I plan on continuing the NSR website. Including promo videos, helpful links, a calendar, recaps, pictures, and all important contact information. By keeping the parents in the loop we can increase attendance and fundraising. I plan on doing this through remind and facebook groups. I plan on working hand in hand with each regional board member. I will collaborate with the Gizborit to launch an online store linked to the website. I also plan to work with Sh'lichah to enforce more Jewish values and spread more awareness on current events through some of NSR's many media platforms. Additionally, I wish to start a photography committee. Who will take both digital, and disposable pictures at all events. The committee will then use the pictures to create an NSR yearbook. Which will give people something to look back, and remember their time at bbyo. I want to reflect the beauty that is NSR onto social media platforms, and instill pride and gratitude for our region within members.

With Mazkirim, Katvaniot, and Orechim all being under the "Communication Network" you will have a lot of counterparts to manage throughout your term. How will you stay organized and ensure that each counterpart is on track?

I plan on making 4 separate group chats. One for each individual position and one with every position combined. That way I can offer specific assistance by position, but there is still a place for everyone to communicate and bounce ideas off one another. I will also schedule beginning, middle, and end of the year calls to track progress and discuss goals. Additionally, I will schedule at least two counterpart bonding plans.

How will you bridge the gap between general chapter members, the region, and the international order?

As technology advances, we are always finding new ways of communicating. The great thing about social media is it puts no limits on the distances we can virtually travel. By maintaining an active regional chat in the "Girls of NSR" GroupMe, regional members can grow closer even while we are not physically together. Additionally, by representing the unique and diverse aspects of the members of NSR on media platforms, our region will be a place welcoming to everyone. In our day and age, we essentially have the international order at our fingertips. I want to arrange more virtual meetings and GroupMe chats with regions across the order. By doing this, we can learn and understand various traditions and environments that may be different or similar to ours. In doing this, we can grow stronger as a unified organization, region, and as individuals.
